

Handcrafted glass doors are available to complement your designs. These doors include open frame doors as well as multi-panel mullion/grid doors. All glass doors are standard with a rabbeted back for glass unless otherwise specified. Designs with cope and stick assembly will have a 5/8" rabbeted back. Mitre corner doors will have a 1/2" rabbeted back. All doors are manufactured for 1-piece of glass. No glass or hardware is provided.

When ordering, specify the door style and edge to match your doors. Drawings shown are to illustrate the many types and styles of doors that may be available including both mitre joint and cope and stick construction. *(Reminder: Arch style doors available only with cope and stick assembly.)* All drawings are for illustration only and are not to scale.

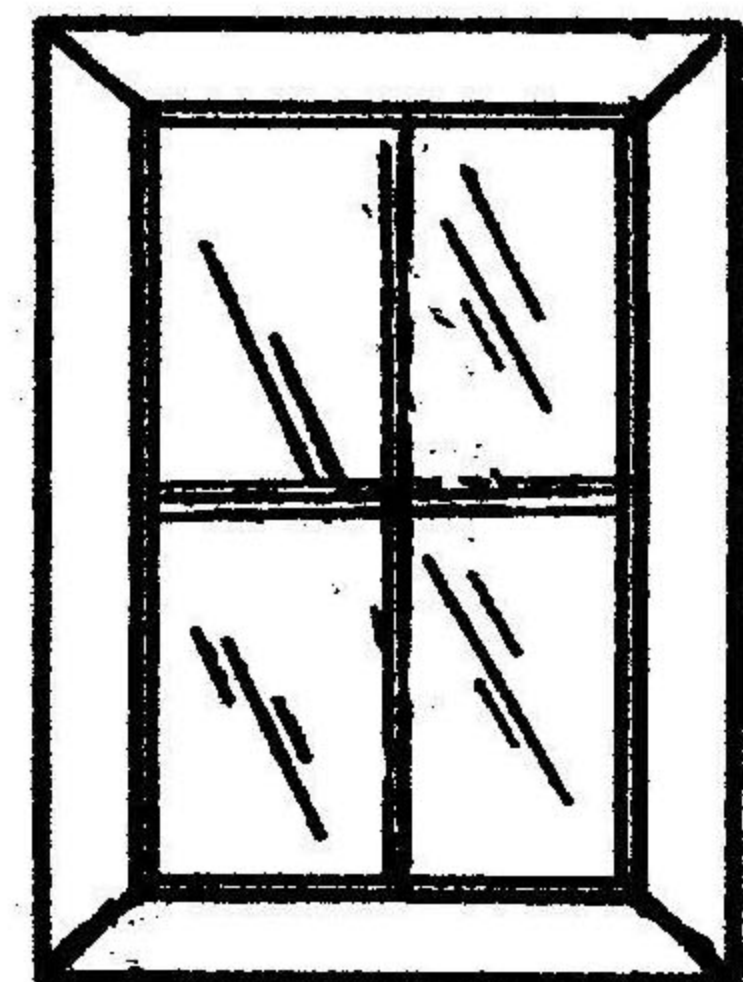

Due to the complexity of these doors, minimum material square foot requirements may vary from door to door. A fee is also charged per opening (lite). Please call for a quote on these items. Use the table for the individual door series as a guideline to determine minimum size requirements for most items. Call for information on minimums required for sash-style doors.
